Skills

- Proficient → Java | SQL Server | Git | REST | Azure | OOP | Maven | Tailwindcss
- Familiar → JavaScript | SpringBoot | MongoDB | Node.js | React.js | CI/CD | SASS
- Learning → Next.js | Sketch | React Native

Experience

Software Engineer

[TietoEvy](#)

Remote, India

08/2022 - Present

Developed work order management system: developed modules to handle work order creation and assignments across vendors and facility managers.

- Implemented cost control features with real-time insights into material procurement and expenses.
- Automated purchase order generation and centralized repository for property data for increased efficiency.
- **Impact:** This resulted in a 10% operational efficiency gain through reduced manual tasks and faster turnaround times.
- **On call:** Part of L3 development support for escalated production issues.
- **Day to day work:** Development, CI/CD Pipeline Integration, code reviews, unit/integration/testing.
- **Tools and Technologies:** Java, REST APIs, SSMS, JPA, Spring Scheduler, React, Elasticsearch, Swagger.

Associate Software Engineer

[TietoEvy](#)

Chandigarh, India

04/2017 - 04/2018

Developed Inventory tracking and management module for Supply Chain Management System.

- Implemented supplier and purchase order management, stock updates and alerts.
- **Impact:** Maintained optimal stock levels, reducing stock outs by 30% and overstock situations by 25%.
- **On Call:** Provided L3 development support for escalated production issues, ensuring minimal downtime and quick resolution of critical bugs.
- **Tools and Technologies:** Java, SpringBoot, JPA, MySQL, Elasticsearch, Docker, Azure.

Education

Bachelor of Engineering

[Chandigarh University](#)

Chandigarh, India

08/2015 - 08/2019

- Major in Computer Science and Engineering
CGPA (Cumulative Grade Point Average): 7.8/10

Projects

- **PORTFOLIO:** Built a portfolio website to showcase my web development skills and track ongoing projects. [Link](#)
- **NextJS Dashboard:** Building a financial dashboard to implement various UI components using NextJS. [Link](#)
